Sustainable Village Project
Budget Worksheet & Shopping List

Please list the names and prices of the items you would like to buy to help the village. Then write the quantity as a fraction or decimal (ex: $\frac{1}{4}$ of an acre of soil or 0.25 of an acre of soil). Multiply the quantity by the price (decimal value of the item). List the result in the Decimal column. Then convert the decimal into a percent to see what percentage of your budget has been spent on that item. This will help you keep track of your budget!

	Item Description	Decimal Value (Price)	Quantity	Quantity x Price (Decimal Value)	Decimal	Percent of budget
Ex	Acre of healthy soil	0.05	5	5 x 0.05	0.25	25%
Ex	2 composting toilets	0.03	2	2 x 0.03	0.06	6%
